

Carefully Crafted

Elevating solutions for every moment in life

Cibães | symmetry

Elevating solutions made for you

Cibes Symmetry combines US craftsmanship with Swedish innovation and design. Our specialty is high-quality elevator solutions, tailored to your requirements for style and comfort.

Whether you prefer traditional charm or contemporary minimalism, or anything in between, we have got you covered. Our wide range of ADA and ASME compliant lift products makes it easy to find an accessibility solution for your home, commercial property, or public building.

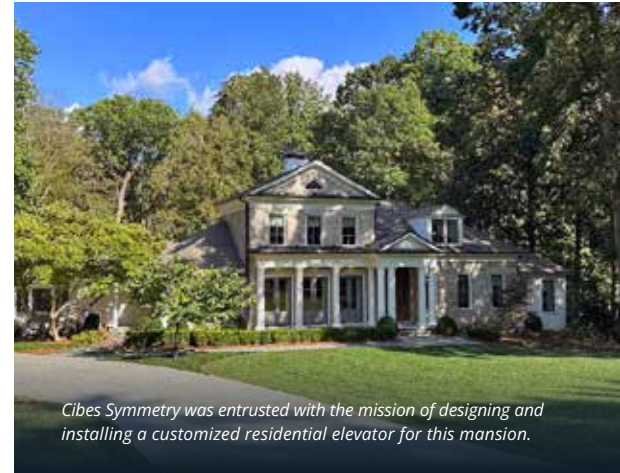

Life. Elevated.

Entrust us with your project

Our elevators are produced in our own factories in the USA and Sweden. That means that we are in control of the manufacturing process from start to finish and can handle almost any customization request.

To offer you the great customer experience that you deserve, we combine direct sales with a nationwide distribution network of handpicked, authorized partners. In addition, all elevators are carefully tested and checked before they leave our factories and come with best-in class warranties.

Cibes Symmetry was entrusted with the mission of designing and installing a customized residential elevator for this mansion.

Wide range of elevating solutions

Cibes Symmetry provides a wide range of elevator models and sizes to adapt to a large variety of locations and needs. This is reflected in our wide spectrum of clients, ranging from home and business owners, to municipalities, schools and other governmental entities.

Space-efficient & innovative

We specialize in space-efficient, custom-made elevator technologies that preserve as much of your square footage as possible, without sacrificing passenger comfort.

Regardless of what Cibes Symmetry elevator model you choose, our elevating solutions require much less space than conventional elevators.

Save time & money

Because our elevators are very compact and delivered in ready-made elements, the installation of your elevator requires minimal building adaptation.

While conventional elevators often take several weeks to install, many of our models can be installed in just a few days, saving you a lot of time and money.

Architect Partner

Working with us, you get access to one of the most complete product portfolios of ADA and ASME compliant elevating solutions in the country. You also benefit from the local support and expertise of our network of dealers, covering most of the country.

Everything you need at your fingertips

We understand that your time is valuable. That is why we have created a special space for professionals on our website, where you find anything from drawings and downloads to technical information.

We accompany you at every stage

With Cibes Symmetry you are in safe and experienced hands. Your local dealer will support you through all the stages of your project from planning and designing, all the way through to installation and maintenance.

In 2023, we entered the top 3 of the Forbes List for Best Home Elevators. To me, that's a testament to our commitment to our customers and our ability to customize our elevating solutions to their needs.

Michael Graff, VP Sales Americas

Quality & safety

To us, quality and safety matters, and these are not just empty words. We actually have a set-up in place that allows us to be in control of quality and safety at every stage of product life - before, during, and after project completion.

- *Production takes place in our own factories in Sweden and the USA.*
- *All elevators undergo extensive testing and quality checks, before leaving our factories and come with best-in class warranties.*
- *Sales, installation and after sales services are provided by our network of authorized dealers.*

Codes & certification

Strictly following US national code guidelines and adhering to local jurisdiction requirements and variances, all our products meet UL standards, and are ADA and ASME compliant.*

Experienced dealer network

We only work with handpicked, authorized dealers that have the right training and knowledge to sell, install and maintain our products.

You find our authorized dealers in over 50 locations across the USA, meaning that you are never very far from a Cibes Symmetry dealer. Contact us today to get in touch with your closest dealer.

Dealers you can count on

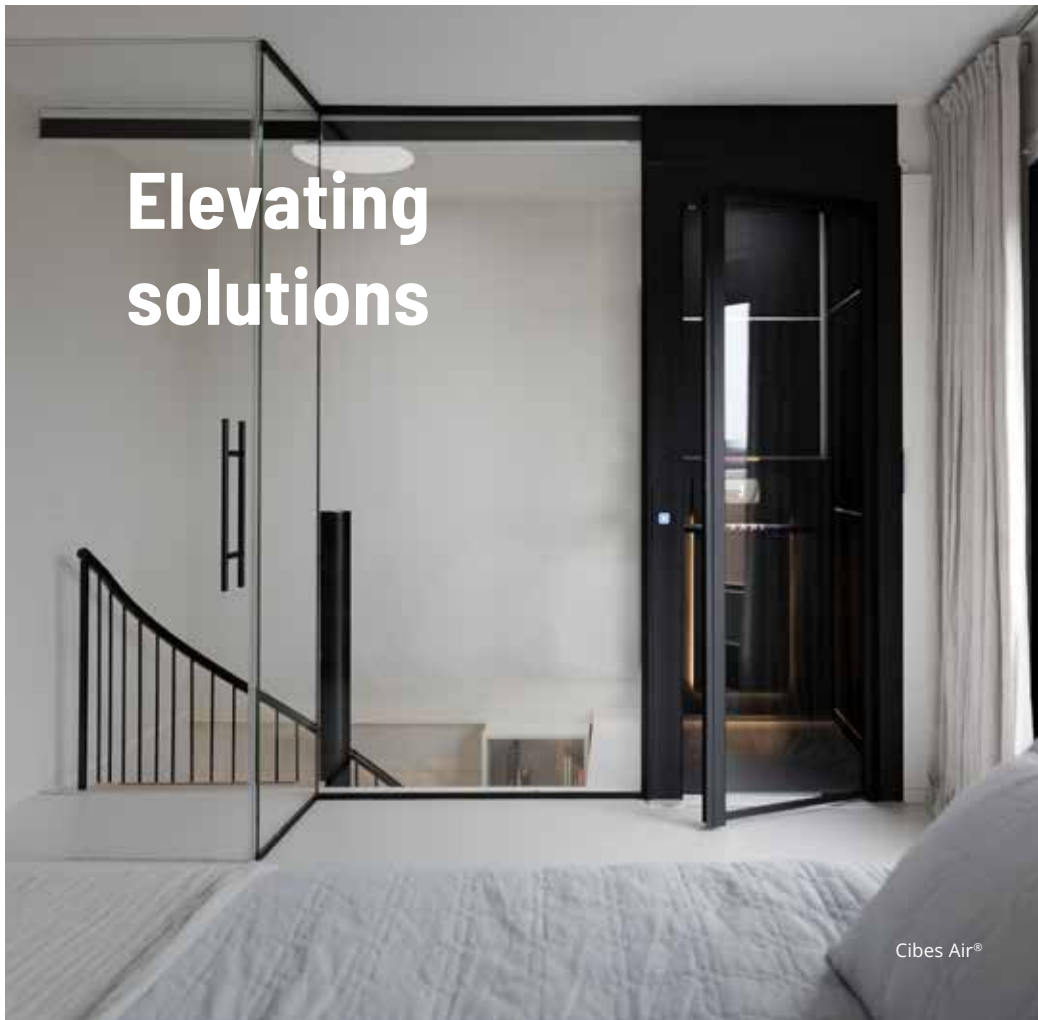

Our dealers offer you a wealth of knowledge and experience and know how to handle most project challenges. If your project has a tight timeline, needs special customizations, or you just need to make sure that the elevator complies with your local accessibility code, talk to your Cibes Symmetry dealer.

Your dealer will advise you and take care of everything from ordering to delivery and installation. Together, you make a team, with the common goal of taking your elevator project to successful completion.

* UL (Underwriters Laboratories), ADA (Americans with Disabilities Act), ASME (American Society of Mechanical Engineers).

Elevating solutions

Home elevators

Our home elevators are available in many different models and sizes. If you are looking for an elevator that is small enough to fit into a wardrobe, we have it. If you need a spacious and wheelchair-friendly elevator, we have that too.

One of the greatest advantages of our home elevators is that you will not need to sacrifice more floor space than is absolutely necessary. Another advantage is that elevator installation can be done and dusted in just a few days, requiring only minimal building alterations.

All our home elevators are custom-built, designed and made in America or Sweden, depending on the model.

Vertical platform lifts

If you are looking for a compact and user-friendly elevator, with fast delivery and installation, a vertical platform lift is a great choice.

Our vertical platform lifts meet the requirements of ADA and come in a great variety of designs to integrate seamlessly with your building.

We offer vertical platform lifts with, or without, shaft enclosure, as well as models designed for outdoor conditions.

All our vertical platform lifts are custom-built, designed and made in America or Sweden, depending on the model.

Commercial elevators

To adapt to the needs of your business, we offer you a wide choice of space-saving and user-friendly commercial elevators, ranging from large, high-rise elevators, to small, low-rise solutions.

Investing in an elevator adds value to your business, by increasing real estate value, facilitating company logistics and offering comfortable access to a wide range of customers - from people using wheelchairs, canes, or crutches, to parents with strollers.

All our commercial elevators are custom-built, designed and made in America or Sweden, depending on the model.

Material handling lifts

Our material handling lifts, or VRCs (Vertical Reciprocating Conveyors) save time, reduce physical strain, and optimize the workflow, allowing your staff to focus on the more important tasks at hand.

The material handling lifts we make are designed to transport goods and materials only, no passengers. For that reason, all elevator models of this type are operated from a location off the platform.

All our material handling lifts are custom-built, designed and made in America.

We innovate for you

We combine US craftsmanship and expertise with a more than 75-year-old legacy of innovative Swedish engineering and design to create accessibility solutions tailored to your needs. Our customers are at the heart of everything we do, and everything we innovate, we innovate for you.

Cibes Air® platform lift

Sustainability matters

At Cibes Symmetry, we are committed to reducing the impact that our products and services have on the planet. That is why we have created a clear strategy to integrate sustainability in the way we do business.

Manufacturing an elevator will always leave a carbon footprint but we strive to reduce it by improving the efficiency of our processes and minimizing waste.

We also provide a wide range of modernization services that make it possible to extend the product lifetime of your elevator, which is one of the best ways to reduce environmental impact.

Our legacy

Cibes was founded in Sweden in the late 1940s and Symmetry was created by a group of entrepreneurs in the USA more than 60 years later. Although we have different origins, we share the same passion for innovation, quality and customer care.

Today, we are Cibes Symmetry, specializing in beautifully crafted and expertly engineered elevating solutions, made in the USA and Sweden. Innovation is engraved in our DNA, and we always strive to refine and perfect the products and services we provide.

Life. Elevated.

Our company vision captures exactly what we want our elevating solutions to do for you. We want our products to elevate life, in every sense.

Intuitive lift design

To give you an example of one of our latest elevator innovations, we introduce you to the Cibes Air®. The elegant, contemporary design of this elevator offers you a unique user experience, where form and function work together to guide your senses.

One of the unique features of the Cibes Air® is that the floor buttons are integrated with the handrail, making elevator operation both easy and intuitive: You simply grab on to the handrail to travel and release it to stop.

The Cibes Air® is a space-efficient, ready-made platform lift that can be installed much faster than a conventional elevator. Whereas most conventional elevators will take several weeks to build, the installation time of the Cibes Air® is just a few days.

Available in 17 platform sizes, the Cibes Air® offers you the choice between a wide range of colors and materials in our 3 different design concepts: Metal, Textile and Wood.

Our lifelong commitment

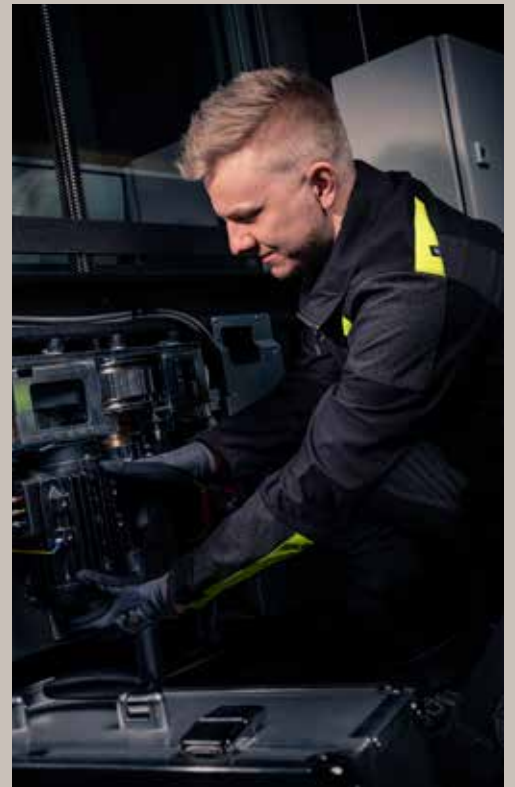

Our commitment lasts throughout the lifetime of your elevator and includes high-quality maintenance services. A well-maintained elevator will perform better, last longer and need fewer replacements of parts. In addition, regular maintenance makes it possible to identify and correct minor issues before they result in expensive repairs. How often your specific elevator needs maintenance depends on various factors, such as the frequency of use, where it is installed (home/public, for example) and its age.

A condition for elevator warranty

We take maintenance and inspection very seriously. In fact, your elevator is required to be maintained and inspected a minimum of 2 times per year by an authorized Cibes Symmetry dealer for your elevator warranty to apply.

Sign a service agreement

The easiest way to ensure that your elevator receives regular maintenance is to sign a maintenance contract with your Cibes Symmetry dealer. Contact your dealer today to get a maintenance plan tailored to your needs.

Our company was founded in 2008, by an entrepreneurial group of people, driven by the vision of elevating life across the US. Today, Symmetry has become a household name for elevators in North America, with high rankings on the Forbes List for Best Home Elevators.

In 2022, we joined forces with global Swedish elevator manufacturer Cibes Lift Group and became Cibes Symmetry. Together, we offer you close to a century of consolidated knowledge, combining Swedish innovation and design with US craftsmanship and expertise. Our wide range of ADA and ASME compliant elevating solutions is manufactured in the US and in Sweden and distributed through our nationwide network of authorized dealers.
