

Symmetry Residential Elevator Solutions

A Luxury Home Elevator, Reimagined

Naturally Beautiful

Cibăș | symmetry

A New Standard in Home Elevators

Antera is the premium residential elevator brand of the Cibes Lift Group, created for modern residences where design, technology, and comfort are equally essential.

Designed for luxury homes, penthouses, and architect-led projects, Antera combines advanced engineering with refined materials and personalized design possibilities. Each elevator is built to integrate seamlessly into the home, enhancing movement, accessibility, and everyday living.

With more than 70 years of elevator innovation behind it, Cibes Symmetry brings proven safety, reliability, and sustainability into a new generation of residential mobility.

**Designed for homes.
Engineered for life.**

Shared Luxury Experience

Two Installation Solutions. One Luxury Experience.

Antera offers two installation approaches designed to adapt to different architectural needs while delivering the same refined comfort, advanced technology, and premium design experience.

Both models offer identical premium finishes, intelligent controls, advanced safety systems, and customizable design options — ensuring a consistent Antera experience regardless of installation type.

Antera – Without Shaft

Designed for projects where a shaft structure is already in place, the elevator is supplied as a cabin-only solution, without a glass or steel shaft provided by Cibes Symmetry. The elevator is installed within the customer's existing hoistway.

This flexible approach allows homeowners to integrate a premium elevator into existing architectural conditions while maintaining the same refined materials and ride comfort.

Best Suited For:

- Homes with existing hoistways
- Renovation and modernization projects
- Concrete, steel, or other adequately reinforced structures

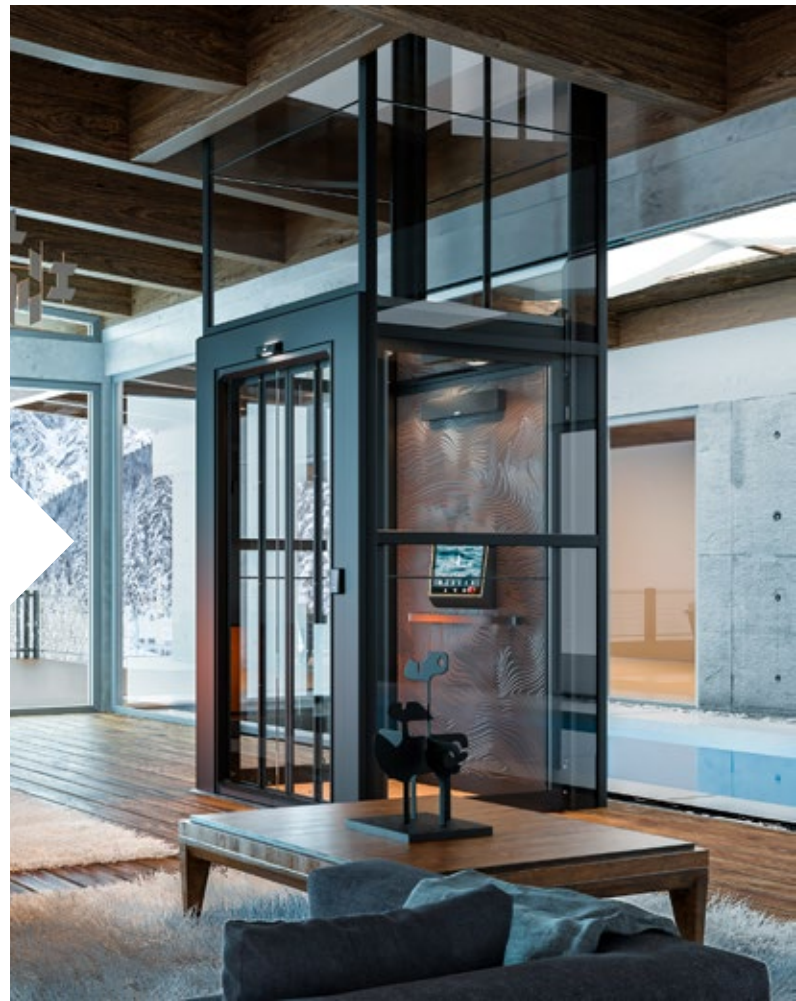

Antera – With Shaft

Designed for homes where a dedicated shaft can be incorporated into the architectural plan, the elevator offers a fully integrated elevator solution that blends seamlessly with the residence. It includes a glass or steel shaft system provided by Cibes, ensuring cohesive design and simplified installation.

This built-in shaft design enhances spatial harmony while delivering a refined, traditional elevator experience for modern living.

Best Suited For:

- New residential builds
- Homes with planned shaft space
- Fully integrated architectural designs

Inspired by Nature Designed for Living

The name Antera reflects balance — strength and lightness, technology and nature, precision and beauty.

Every detail is designed to create a calm and effortless movement through the home. Clean architectural lines, warm materials, and carefully crafted lighting transform the elevator from a functional necessity into an integrated design feature.

Antera is not simply installed in a home — it becomes part of its architecture.

Movement, Elevated

Antera creates a seamless connection between floors, spaces, and moments. Quiet operation, intuitive controls, and refined materials deliver an experience defined by comfort and elegance.

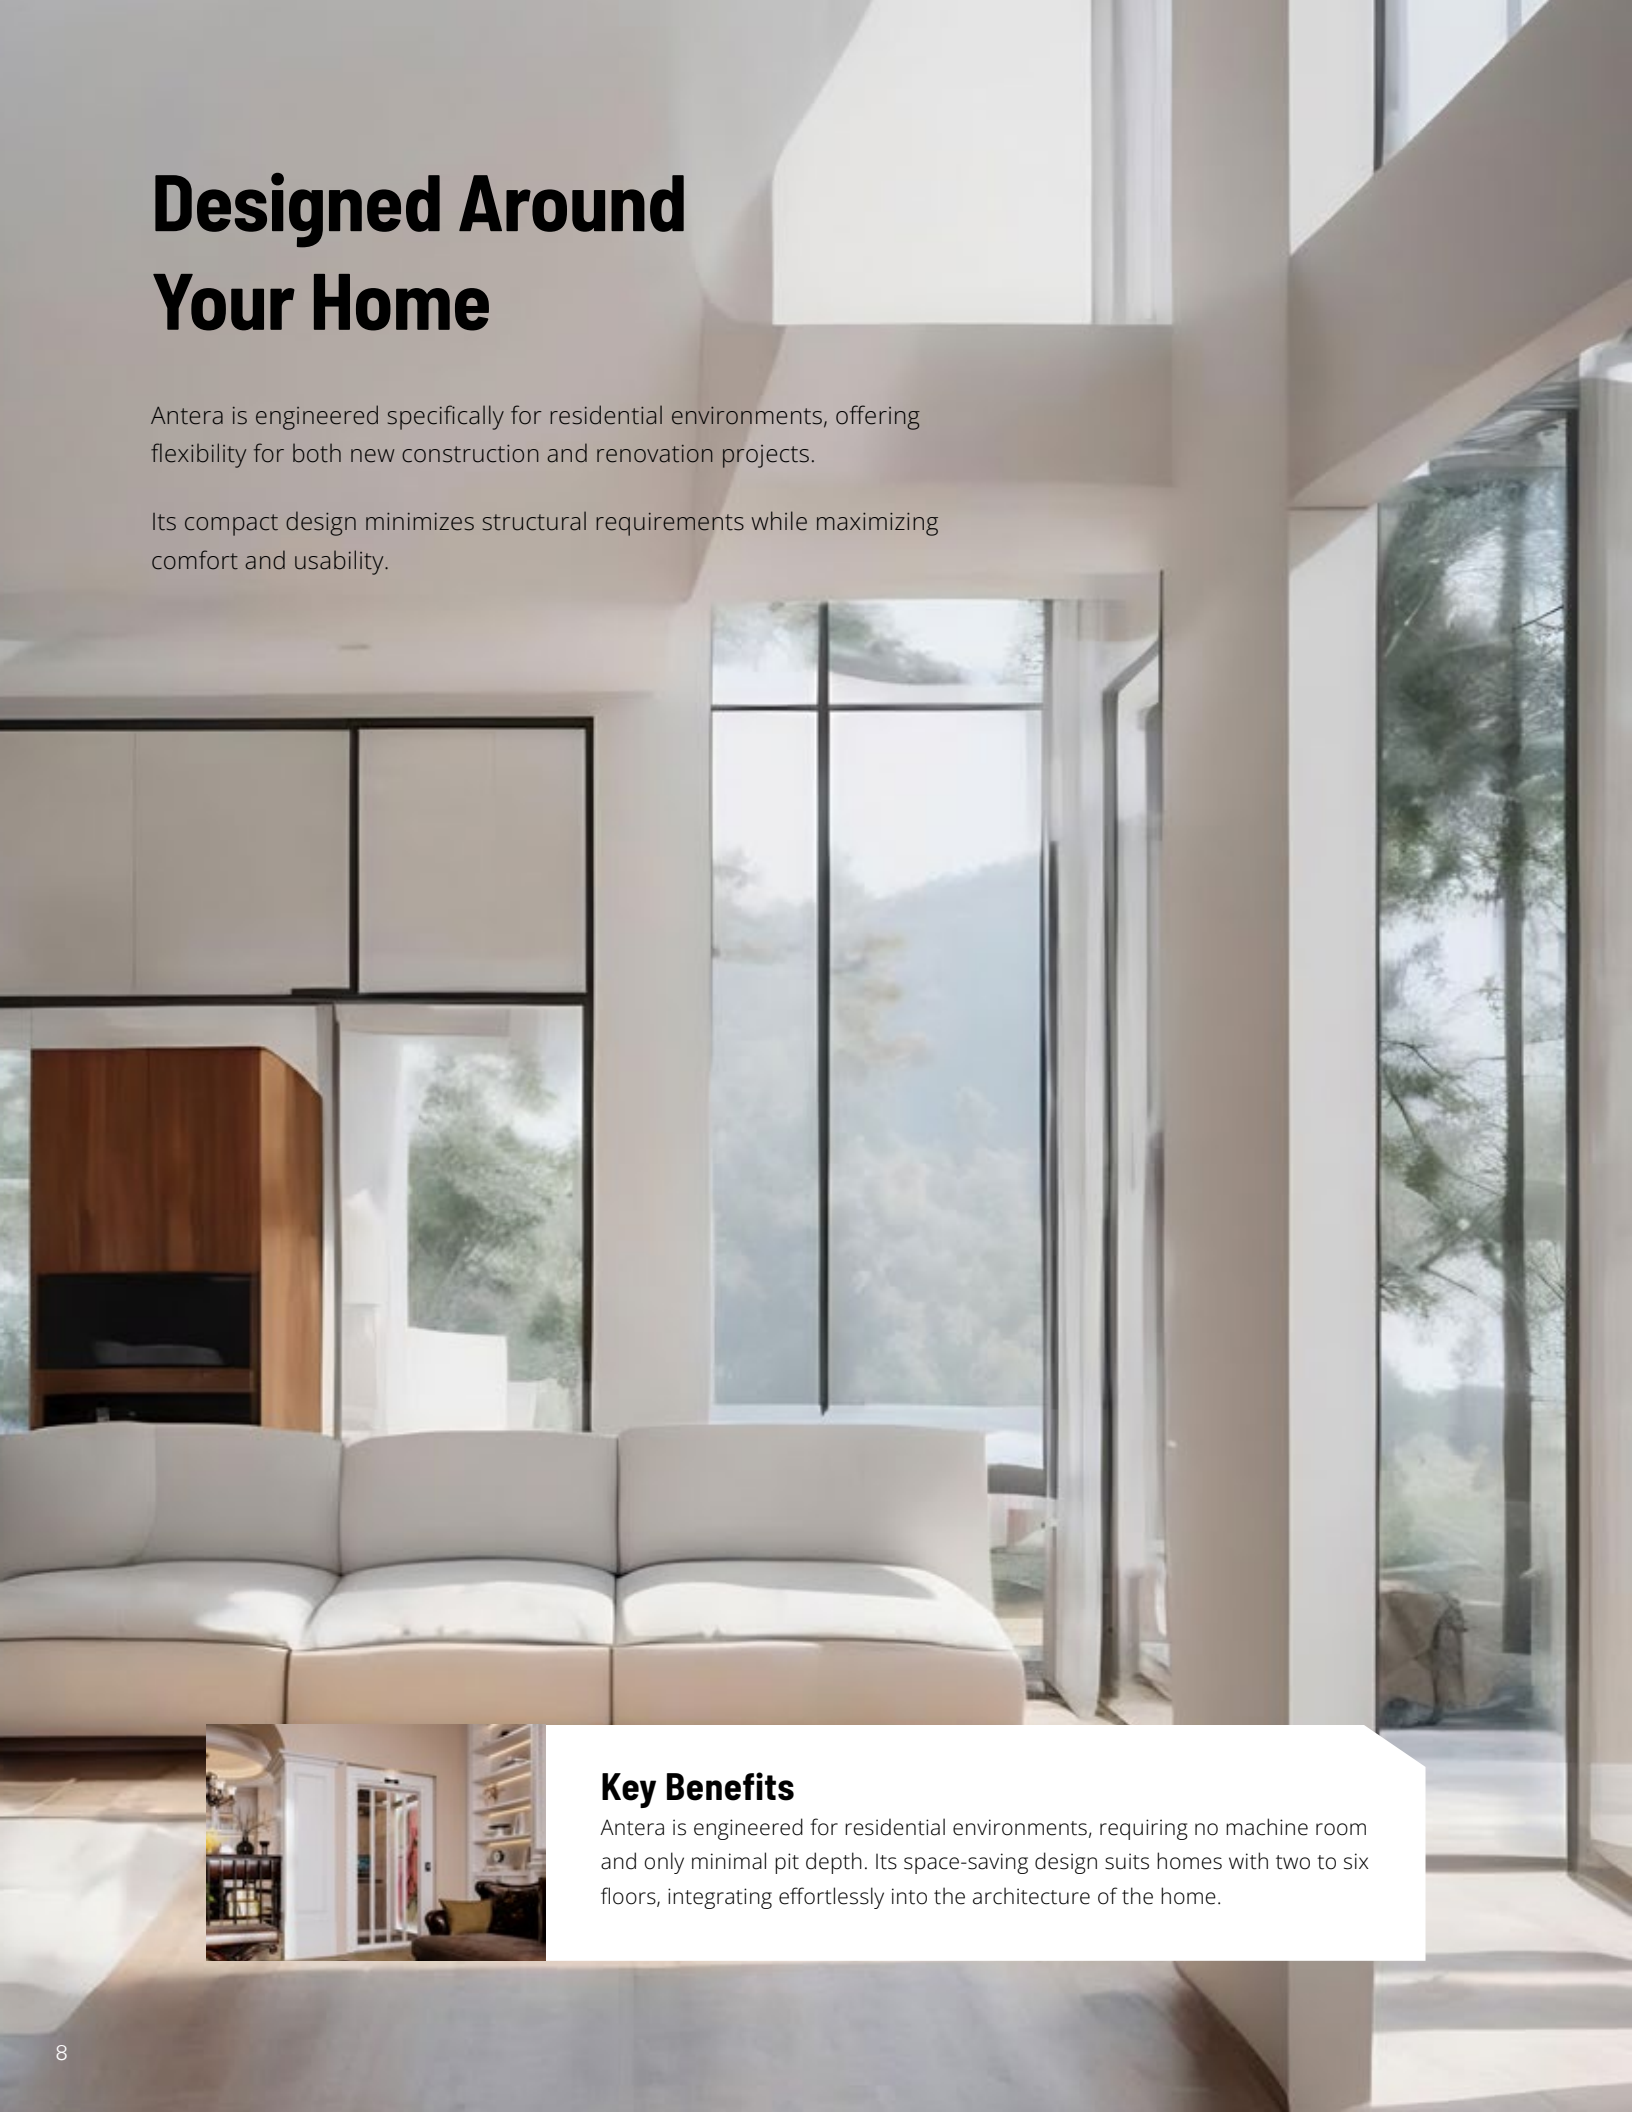

”

“Luxury is not added. It is experienced.”

Designed Around Your Home

Antera is engineered specifically for residential environments, offering flexibility for both new construction and renovation projects.

Its compact design minimizes structural requirements while maximizing comfort and usability.

Key Benefits

Antera is engineered for residential environments, requiring no machine room and only minimal pit depth. Its space-saving design suits homes with two to six floors, integrating effortlessly into the architecture of the home.

Smart Control

Antera features an intuitive control system designed for simplicity and personalization, including touchscreen or mechanical interfaces tailored to user preference.

Connected Living

Integrated IoT functionality enables system monitoring, diagnostics, and enhanced service support.

Safety First

Engineered to meet the highest safety standards, Antera integrates advanced monitoring systems and intelligent safety features for complete peace of mind.

Quiet & Smooth Performance

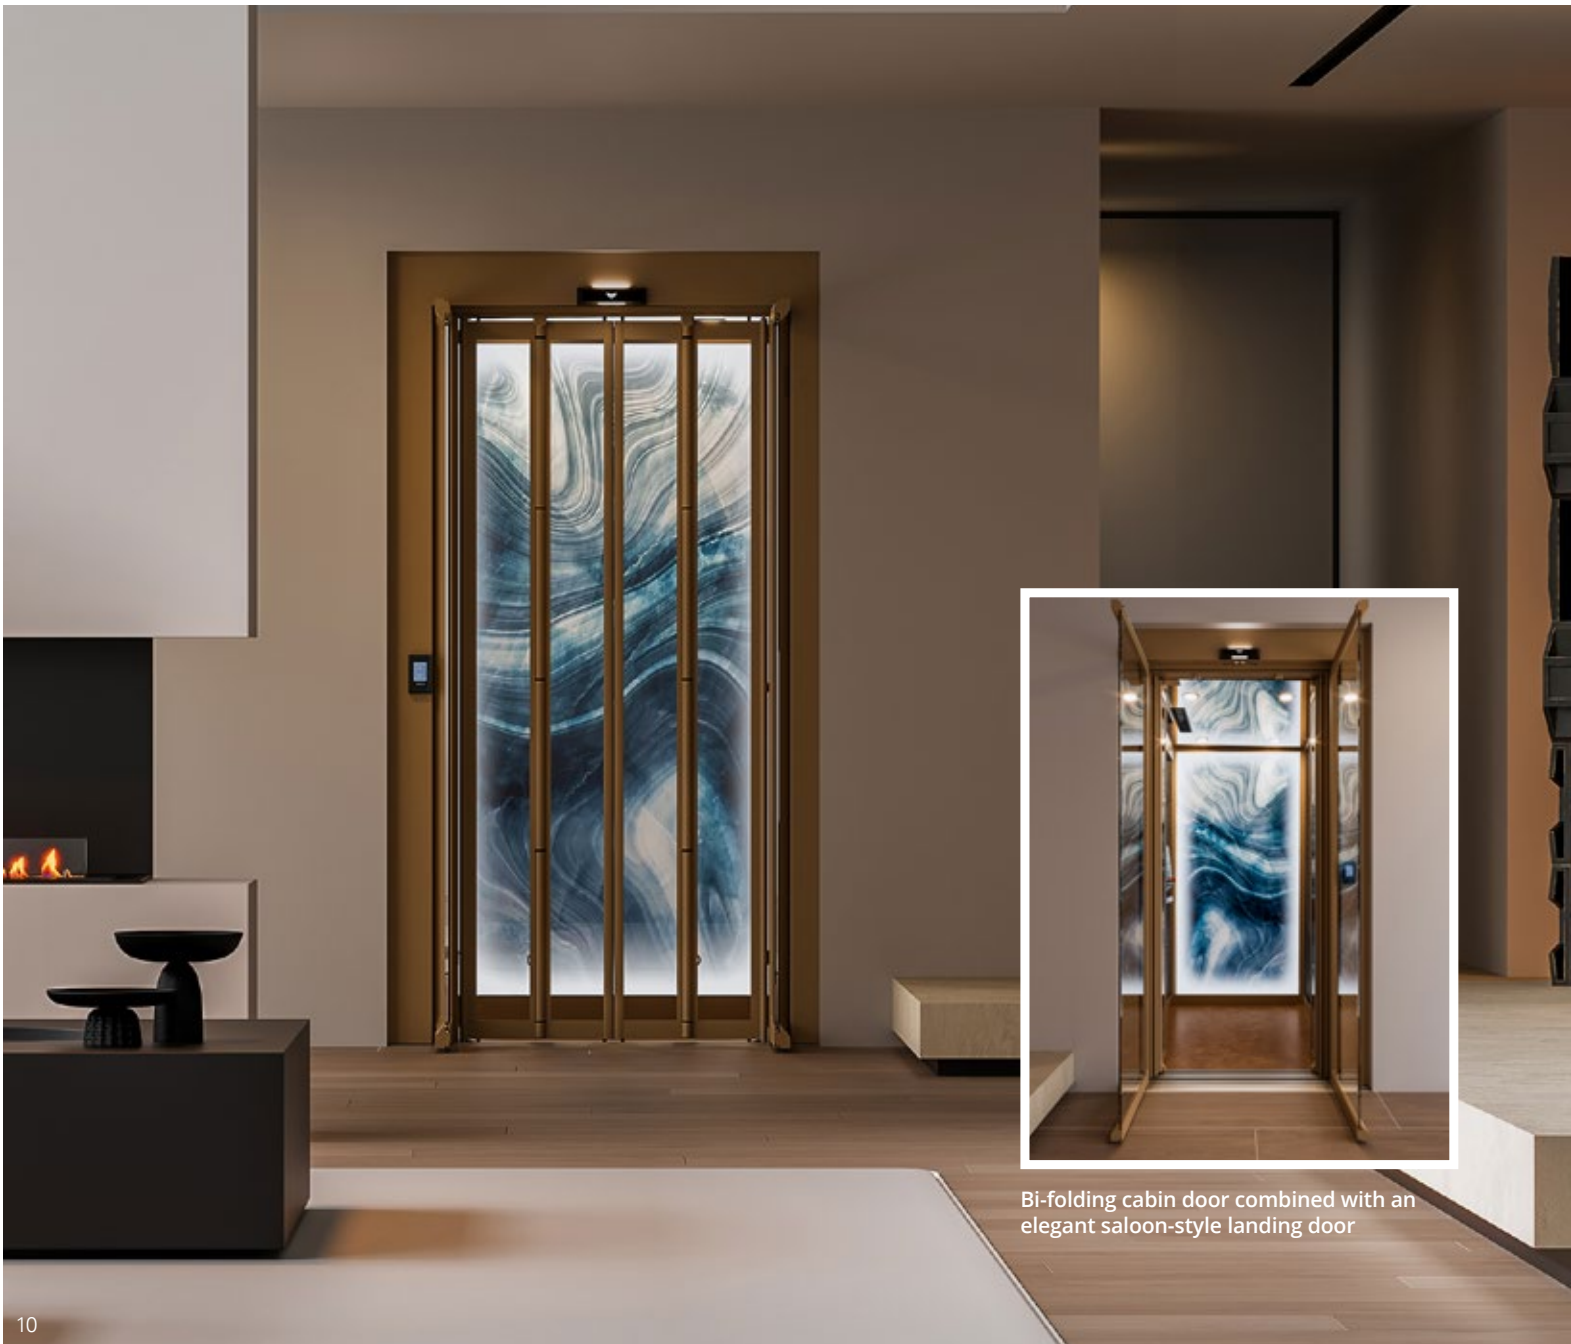

A Permanent Magnet Synchronous Motor (PMSM) ensures exceptionally quiet operation, energy efficiency, and smooth travel between floors.

Flexible Layout Configurations

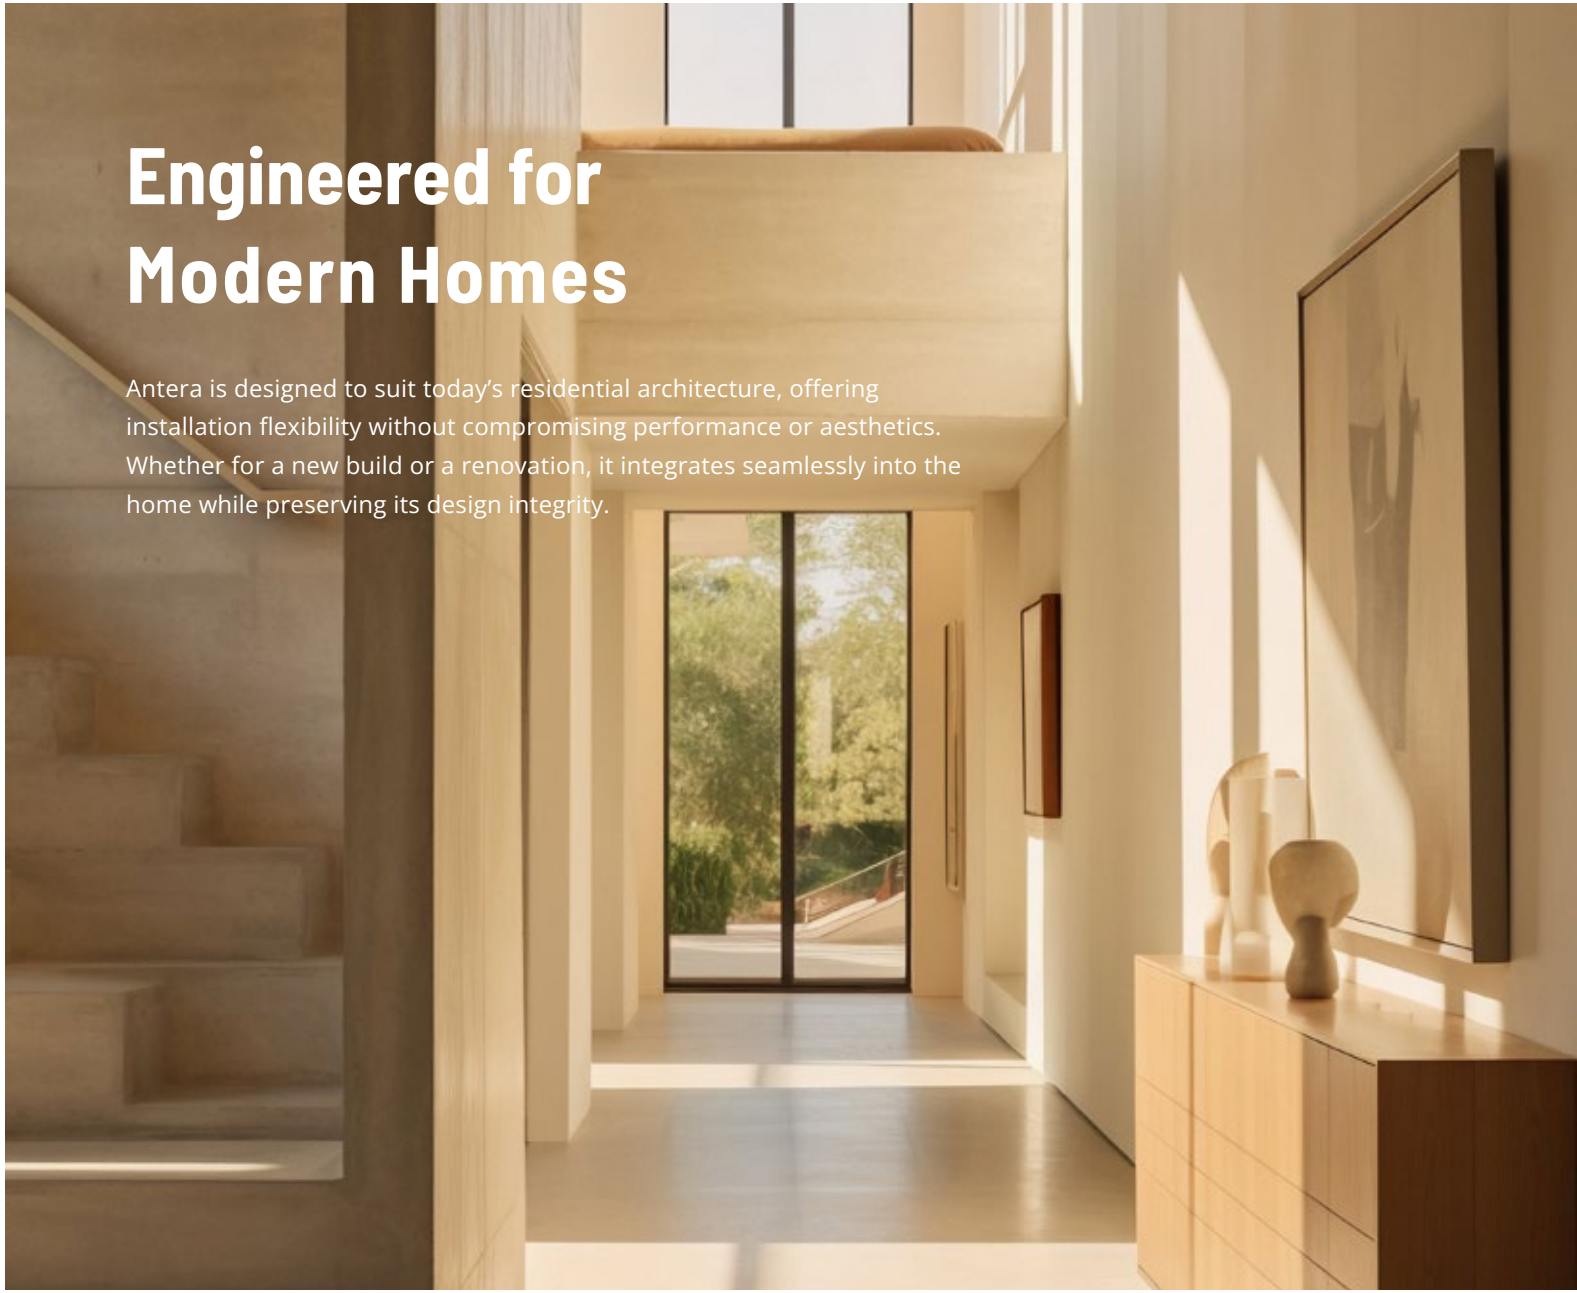

Designed to complement the layout of your home, Antera offers multiple door and cabin configurations. Choose from single-side openings, through-door layouts, or adjacent door arrangements, all thoughtfully engineered to improve circulation and maximize spatial efficiency.

Bi-folding cabin door combined with an elegant saloon-style landing door

Engineered for Modern Homes

Antera is designed to suit today's residential architecture, offering installation flexibility without compromising performance or aesthetics. Whether for a new build or a renovation, it integrates seamlessly into the home while preserving its design integrity.

Flexible & Space-Efficient Installation

Antera offers exceptional installation versatility to complement any architectural vision. It may be installed in a purpose-built shaft, seamlessly integrated into an existing hoistway, or elegantly presented in our signature modular glass enclosure. Requiring no machine room, its refined engineering minimizes structural impact while maximizing spatial efficiency.

Design Your Antera

Every Antera elevator is individually configured to complement your home's architecture and interior design.

Crafted Interior Materials

Select from curated finishes including:

- ① Natural wood cabin walls, or Illuminated acrylic design panels
- ② Satin stainless steel handrails
- ③ Cabin Frame (corners, baseboards) same color as the elevator, bi-folding door, landing door and shaft frame

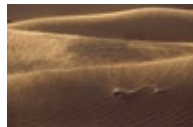

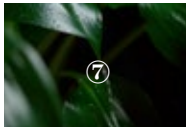

Immersive Comfort

- ④ Integrated speaker system
- ⑤ Mirror ceiling with fan and soft spotlights

Intuitive Car Operating Panel (COP)

A refined control interface designed for effortless interaction. With customizable backgrounds, adjustable screen lighting, personalized floor labels, elevator status display, ventilation control, integrated security lock, audible alerts, and optional music, the COP enhances both convenience and comfort.

- ⑥ 15.6" touchscreen smart COP
- ⑦ Four naturally beautiful backgrounds

Personalization Without Limits

Antera offers a wide range of materials, textures, and finishes, allowing every elevator to reflect the character of the home it serves.

Six Curated Interior Profile Colors

Six refined color options have been carefully selected to create a cohesive interior expression.

13 Unique Patterns

The light panel on the wall opposite the entrance comes in 13 patterns, its edges softly lit to cast a warm glow toward the center. Scan the QR code below to view the complete collection.

Durable, design-driven flooring combining natural aesthetics with long-lasting performance.

Residential Elevator Safety

Safety is fundamental to every Antera elevator. Designed and engineered to meet the highest residential elevator standards, Antera combines intelligent technology with robust mechanical systems to provide reliable, secure operation for everyday living.

Advanced monitoring systems continuously oversee elevator performance, ensuring smooth and stable travel between floors. Intelligent safety sensors help prevent door interference, while integrated emergency features provide added reassurance for homeowners and family members.

Antera elevators are built to comply with applicable residential safety codes and are supported by certified installation and maintenance programs. From intelligent control systems to precision-engineered components, every detail is designed to deliver dependable performance and complete peace of mind.

Key Safety Features

- Intelligent door protection systems
- Real-time operational monitoring
- Emergency communication capability
- Smooth start and stop technology
- Code-compliant safety systems
- Certified installation and service support

”

Code Compliance

Strictly following national code requirements and complying with ASME A17.1, section 5.3.

Complete Peace of Mind

Quality and Support to Count on

Because your safety is our top priority, all Symmetry residential elevators are ASME compliant and adhere to all relevant US codes. In addition, your local distributor will be there to advise and support you throughout the entire process, and we offer you an industry-leading 3-year warranty. With us, you are in safe hands throughout the entire lifespan of your residential elevator.

We Tailor Your Maintenance

Just like a car, your elevator needs to be checked and serviced to make sure that it runs correctly and is safe to use. Our distributors have the expert knowledge and technical training to maintain your residential elevator. Just talk to your local Cibes Symmetry distributor and they will provide you with a maintenance contract tailored to your needs.

Our company was founded in 2008, by an entrepreneurial group of people, driven by the vision of elevating life across the US. Today, Symmetry has become a household name for elevators in North America, with high rankings on the Forbes List for Best Home Elevators.

In 2022, we joined forces with global Swedish elevator manufacturer Cibes Lift Group and became Cibes Symmetry. Together, we offer you close to a century of consolidated knowledge, combining Swedish innovation and design with US craftsmanship and expertise. Our wide range of ADA and ASME compliant elevating solutions is manufactured in the US and in Sweden and distributed through our nationwide network of authorized dealers.
